DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Friday, 12 January 2024 at 06:00 Local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Although widely Low levels of air pollution are expected across the UK on Friday, some very isolated areas of Moderate pollution are possible in urban areas where winds are light.

Tomorrow: Similar conditions prevail on Saturday. Much, if not the whole UK should see air pollution levels remain at Low levels. However, very locally Moderate levels of air pollution could be reached in urban areas where winds are light.

Outlook: Low levels of air pollution are expected between Sunday and Tuesday, though could very locally reach Moderate levels in urban areas where winds are light on Sunday. Stronger winds on Monday and Tuesday should reduce the risk of the above taking place.
